

## **Surbana Jurong emerges top in design competition and secures one of its largest HDB projects**

Surbana Jurong has clinched one of its largest HDB project to-date after it emerged top in a design competition organised by the Housing and Development Board. We will be providing multi-disciplinary services including architecture, C&S engineering, M&E engineering, cost & contracts management and project management services.

Both Surbana Jurong and CESMA were two of the top five finalists in the competition, pitching against other renowned architectural firms. Surbana Jurong's submission stood out amidst intense competition, and it won following a Quality Fee Method (QFM) of evaluation which recognises the quality of design as a key criteria.

The new HDB project is a built-to-order (BTO) development in Tampines North (Plots N6 C8-10). It comprises residential, commercial and social facilities and is situated near the main park in the newly master planned Tampines North. This new north region is built as an extension of the existing Tampines estate and will feature a new linear park linking it to the existing Tampines Eco Green and Sun Plaza parks. When completed in 2017, the project will house 2,020 dwelling units.

Congratulations to team members from Urban Development 2's SJ Township, Urban Development 1's Building Consultancy Services Central Design Studio, Landscape and Environmental Sustainability Design business units!
